September 1996

Memorandum:

(S-CCO) *The NSA SIGINT Correlation Study - POW/MIA* originated with a request levied by the 1991 Senate Select Committee on POW/MIA Affairs. The NSA POW/MIA Team was tasked to review wartime SIGINT reporting for relevance to the POW/MIA issue and possible correlation to individual POW/MIA cases. At the request of the Senate Select Committee, B56 published the initial results of this review as *B56 Technical SIGINT Report 2-92* for use in the Committee's investigation. The report was also provided to the DIA Special Office for POW/MIA for all-source analysis and comparison with their existing POW/MIA case files. This review has been ongoing since 1991 and the body of information has more than doubled in size from the initial input to the Senate Committee.

~~SECRET~~

~~SECRET~~**Southeast Asia/POW-MIA Affairs:****NSA SIGINT Correlation Study - POW/MIA (FOUO)****Executive Summary:**

~~(C-CCO)~~ This SIGINT correlation study is the result of a nearly five-year effort by NSA to correlate all available Vietnam War-era SIGINT to specific Vietnam War Prisoner Of War/Missing In Action (POW/MIA) cases.

~~(S-CCO)~~ This effort reevaluated all available Vietnam War-era SIGINT holdings for any information pertaining to U.S. POW/MIAs in Southeast Asia in an attempt to correlate this information to specific POW/MIA cases. The resulting correlations are based primarily on SIGINT reports from 1961 through 1975. In some isolated cases memoranda, watch officer notes, and/or analyst communications have been included where the input or analysis adds to the understanding of accompanying documents or could aid in the resolution of the case. The correlations are not definitive and are intended for further all-source analysis within the Department of Defense.

~~(S-CCO)~~ Primary emphasis was placed on the retrieval and review of electronic storage of wartime SIGINT reports. Supplemental searches through physical records were conducted by NSA Records Center and History personnel. Over 7.5 million reports were machine-scanned, with more than 30,000 documents extracted for manual review. Successive analysis further reduced this total to about 6,200 documents. Of these, nearly 2,500 were tentatively correlated to approximately 1,400 specific POW/MIAs cases. These are the documents listed in this report.

~~SECRET~~

(U) This report is composed of three primary fields, in columnar format:

~~(C-CCO)~~ The first column is the Department of Defense POW/MIA case reference number (REFNO). The REFNO is assigned strictly by case/incident, and many represent more than one individual POW/MIA. Some entries have no assigned REFNO; these entries are accounted for by date only. Many of these "no-REFNO" entries involve individuals identified by name in SIGINT. These individuals were released without a REFNO being assigned to their incident.

(U) The second column is the date of the loss incident. All entries are chronological, therefore some REFNOs are out of numerical order.

~~(FOUO)~~ The third column is a list by date-time-group (DTG) and report serial for SIGINT reports which may correlate or have been evaluated for correlation to each case. Many entries have no SIGINT correlations listed. This is accurate within the parameters of our computer search and subsequent initial analysis.

~~(FOUO)~~ In some instances there is a fourth column containing an additional or partial serial within parentheses. This reflects either a corrected or an alternate report serial. These are included to aid in retrieval of the reports.

~~(C-CCO)~~ As previously noted, these SIGINT correlations are not definitive and require all-source analysis and validation by the Defense Missing Persons Office (formerly the Defense POW/MIA Office, formerly the DIA Special Office for POW/MIA). This is an ongoing effort and, consequently, this document may be updated due to further analysis or as more information becomes available.
